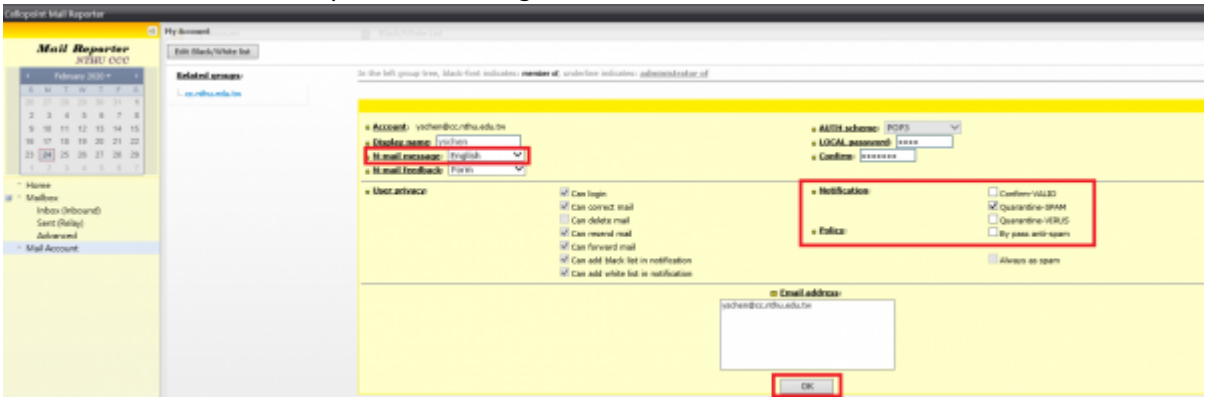
How Do I Activate or Deactivate Periodic Notification Mails?

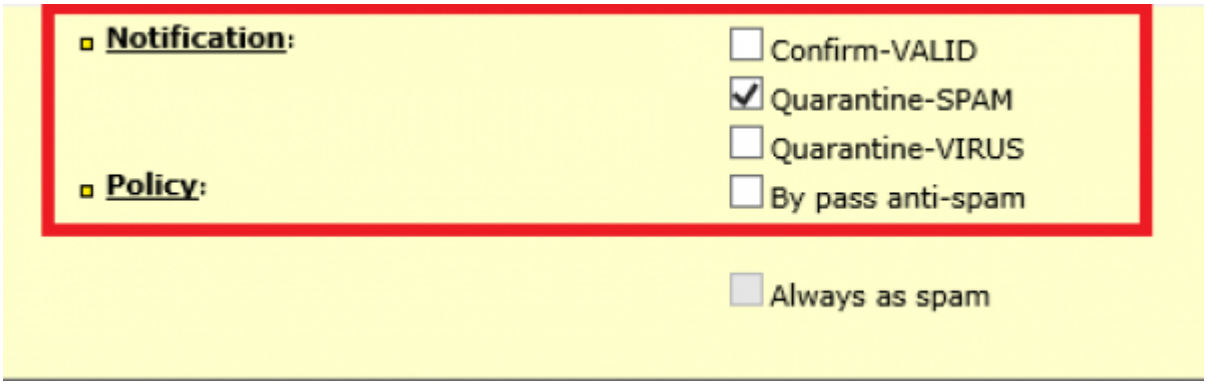
Users can decide whether to receive notification emails from the anti-spam service provided by the Center through the Mail Reporter (The system, by default, sends anti-spam email notifications every day around midnight, but does not send notifications for valid emails or virus-infected emails) The method for changing the settings is as follows:

Changing Notification Settings

1. Log in to Mail Reporter.
2. Click **“Mail Account”** at the bottom left.
3. In the middle upper part of the screen, the “N-mail message” option allows you to change the language of the notification email. The default is Traditional Chinese.
4. View the “Notification” option on the right.



5. Check the “Notification” options, as desired: “Confirm-VALID”, “Quarantine-SPAM”, and “Quarantine-VIRUS”, Check all that you wish to receive; Uncheck all that you do not wish to receive.



6. Click “OK” at the bottom to complete configuration.

Example of Valid Email Notification
