How do I access WiFi during inter-school roaming?

1. When NTHU teachers and students are roaming off campus, please add **@wlan.nthu.edu.tw** after the account name. For example, if the account name is u940001, the format of the account is u940001@wlan.nthu.edu.tw.
2. Common names of wireless access points (SSID) when roaming
   - TANetRoaming：Use Web-based authentication.
   - eduroam：Use 802.1x authentication.
3. When users access the WiFi of a school they are visiting, users should directly consult the school's WiFi management unit (such as the computer center) if they encounter any issues.
4. Please use the " Cross-Campus Roaming Status" to check the status of NTHU's WiFi roaming status.
5. For information on inter-school roaming, please refer to the Ministry of Education's TANet's Taiwan Academic Network Roaming Center.
