

Instruction for installation of web editor software

⚠ To avoid being illegal, you are reminded to notice the relevant laws of copyright when creating your webpage.

- The filename of homepage is index.html
- The free open-source web editor software Nvu is recommended. It is suitable for beginners as it turns many HTML commands into buttons. [Nvu Dowanload site](#)
- Only one free software is provided for your use here. You can also use other software and [upload](#) the edited page to the FTP Site.
