Network config - TCP/IP settings for Wifi Router

Description

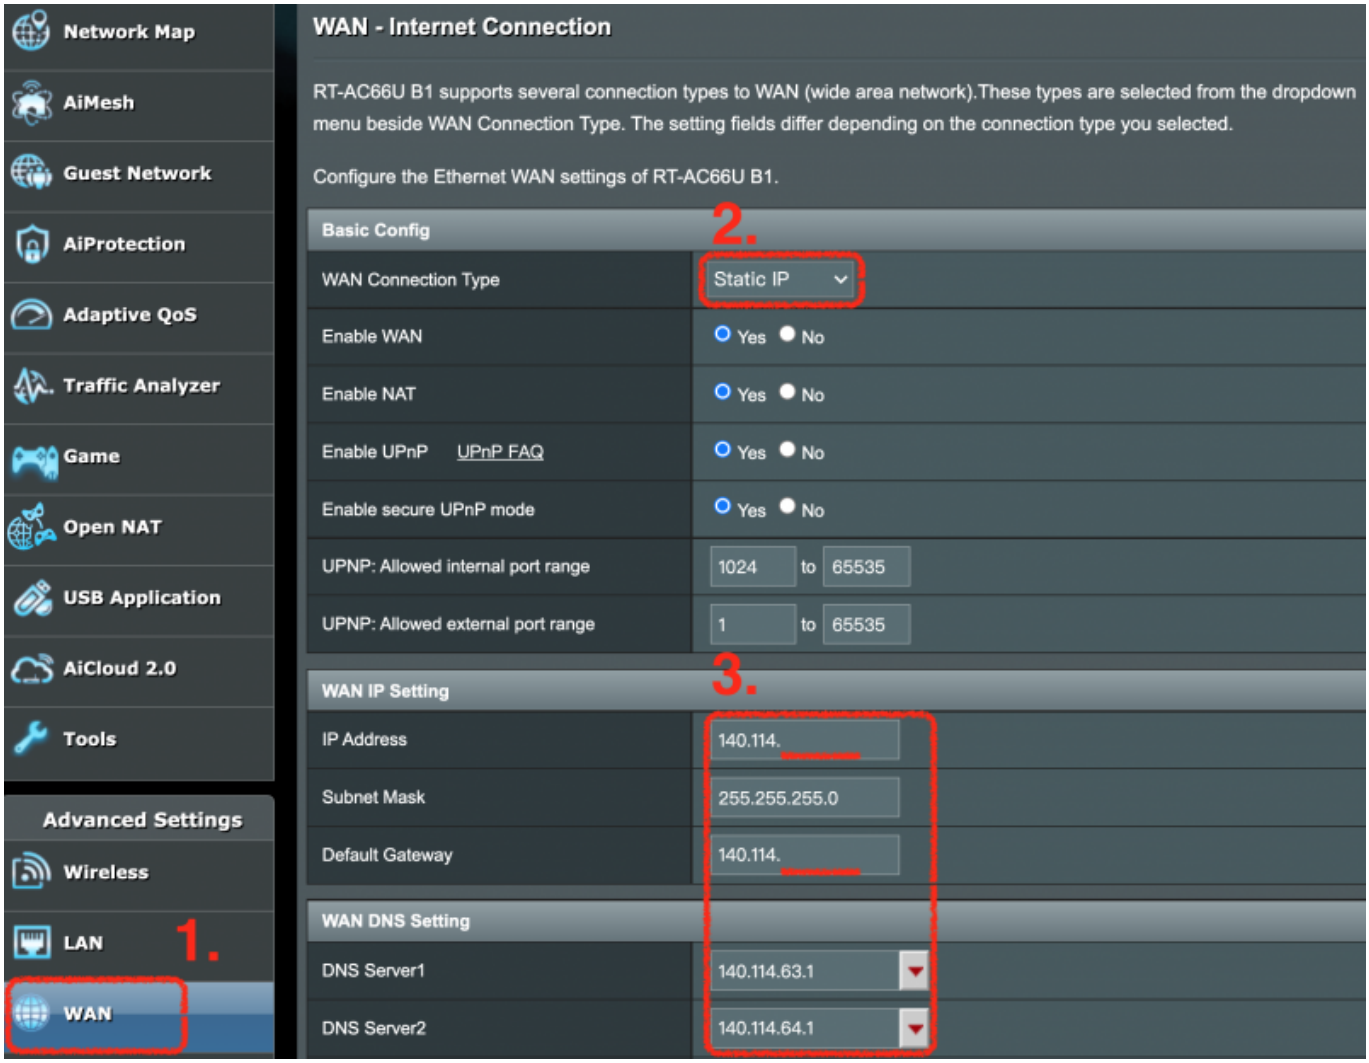

Due to the numerous brands and models of Wifi routers on the market, we cannot explain them in a unified manner. We recommend that you refer to the manual to set up the Wi-Fi router or search on Google. Thank you.

Example for ASUS RT-AC66U

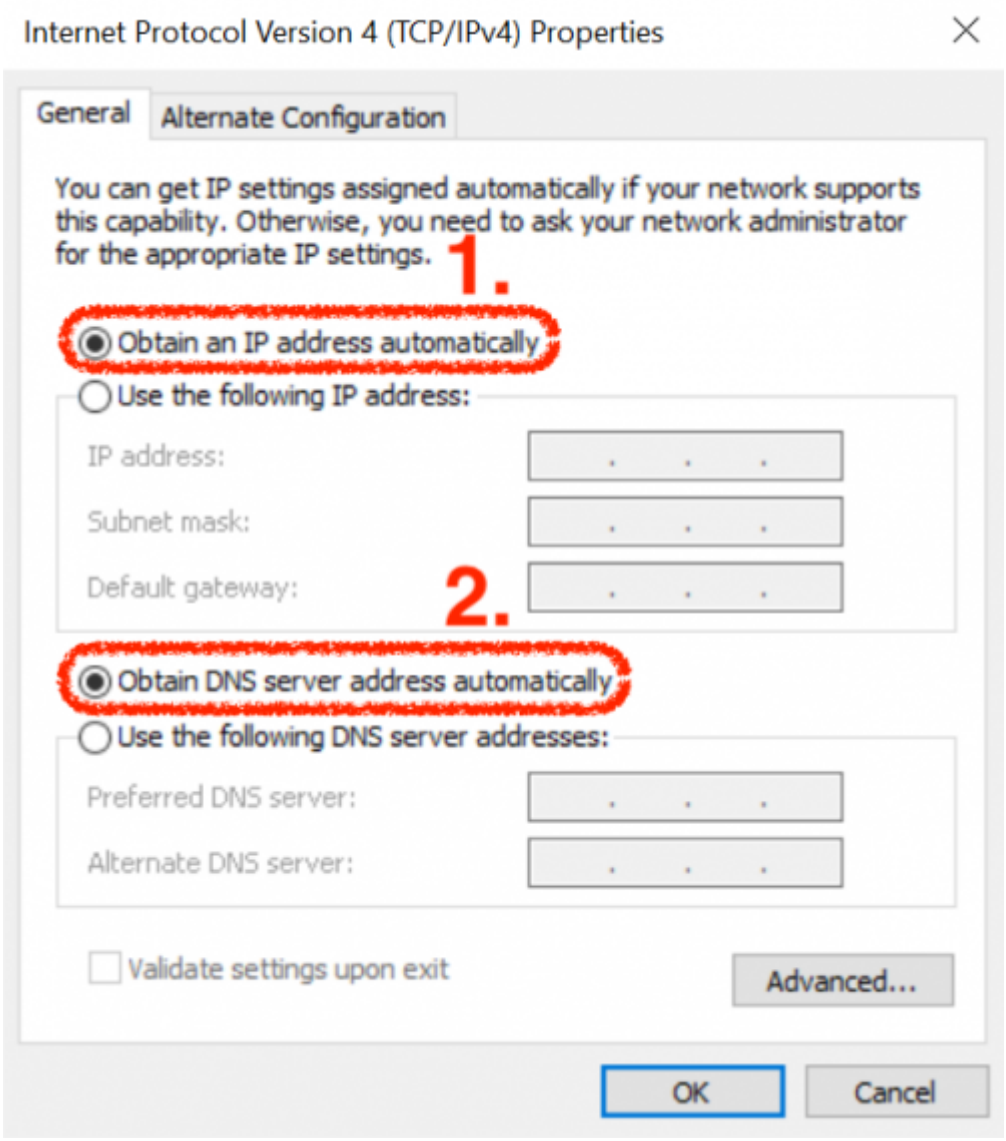

Step1

- 1. Click WAN
- 2. WAN Connection Type choose Static IP.
- 3. Fill in your Dormitory Network IP Information for WAN IP Setting and WAN DNS Setting. Other settings (such as DHCP) use the default value as shown in the following figure:

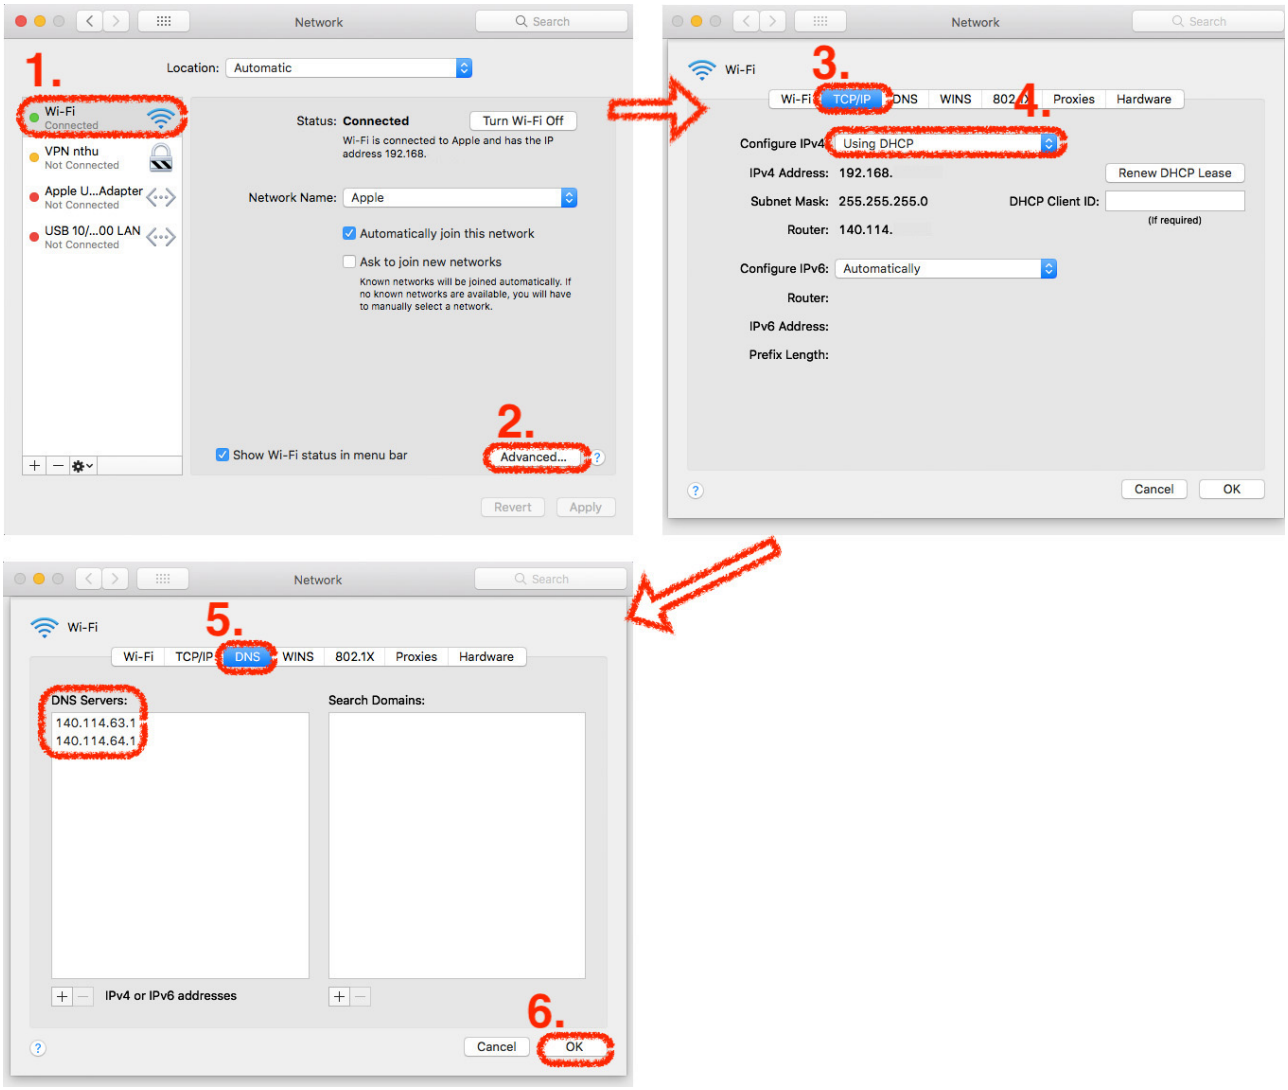

Step2

- 1. Find and select “**Internet Protocol Version 4 (TCP/IPv4)**”, then click “**Obtain an IP address automatically**”.
- 2. Click “**Obtain DNS server address automatically**” and click “**OK**” to submit.

- 3. Apple macOS users check here.

Step3

- Network config completed, feel free to connect the Internet.
