

New function :the notice letter sent when the amount of download data from personal website is too much

Since June, for [the personal website using an e-mail account provided by our division](#), if its data amount or download frequency by others is too much, a notification mail containing the statistics of webpage download of the day the will be sent to the user for his/her reference. The user is also reminded to **pay attention of the relevant rules**.

Yours faithfully
Computer and Communication Center
Division of Network Systems

The notice letter format as shown below:

Subject: {Notice} the amount of download data from your website is too much! (20xx-xx-xx)

Dear sir/madam

□□Due to a large amount of data downloaded or a high download frequency from your website, this notification mail is automatically sent by the system to inform you of this (Note 1).

Nowadays, due to the fast growth of search engines over the Internet, spreading controversial information may be reported or charged. To avoid getting into trouble, you are strongly recommended to ensure the legality of all information in your website. Please read the instructions on the following
webpage:<http://net.nthu.edu.tw/2009/netip>

□□Please follow the following rules when creating your own website

1. All the information linked in your website can be downloaded by public.
2. Do not upload, spread or share any files that violate the copyright law in your website.
3. Any commercial activities in your website to make profit are prohibited.
4. Please follow "Regulations of using Internet in National Tsing Hua University campus" and the relevant rules.
