To advertise wireless networks roaming, user can now connect to the WiFi (SSID:eduroam) by adding “wlan.nthu.edu.tw” after your account when you performing network authentication

Title: To advertise wireless networks roaming, user can now connect to the WiFi (SSID:eduroam) by adding “@wlan.nthu.edu.tw” after your account when you performing network authentication

Description:

- A few years ago, our school joined the eduroam international roaming program from TANet, to push forward international education institutions and academic network for two-way roaming, we have provided wireless network international roaming authentication service (SSID:eduroam), user can now connect to the WiFi by adding “ **@wlan.nthu.edu.tw** ” after your account when you performing network authentication
- For more information about roaming areas abroad and usage, please refer to [About eduroam](#) and [802.1X + PEAP Authenticating](#)
