Date：2023/08/18

【Vulnerability Warning】Browsers such as Google Chrome, Microsoft Edge, Brave, and Opera exist multiple security vulnerabilities (CVE-2023-4068 to CVE-2023-4078 and 6 other vulnerabilities that have been fixed but not announced), please confirm and update as soon as possible!

- Subject: Browsers such as Google Chrome, Microsoft Edge, Brave, and Opera exist multiple security vulnerabilities (CVE-2023-4068 to CVE-2023-4078 and other 6 fixed but unpublished vulnerabilities), allowing attackers to remotely execute arbitrary read write, or exploit stack damage. Please confirm and update as soon as possible!

- Recommended actions：
    1. Please update the Google Chrome browser to a version later than 115.0.5790.170/.171. The update method is as follows:
        1. Open the browser, enter

            ```
            chrome://settings/help
            ```

            in the address bar, the browser will perform version check and automatic update.

        2. Click "Restart" to complete the update.
    2. Please update the Microsoft Edge browser to a version later than 115.0.1901.200. The update method is as follows:
        1. Open the browser, enter

            ```
            edge://settings/help
            ```

            in the address bar, the browser will perform version check and automatic update.

        2. Click "Restart" to complete the update.
    3. Please update the Brave browser to a version later than 1.56.20. The update method is as follows:
        1. Open the browser, enter

            ```
            brave://settings/help
            ```

            in the address bar, the browser will perform version check and automatic update.

    2. Click "Restart" to complete the update.

4. Please update the Opera browser to a version later than 101.0.4843.43. The update method is as follows:

    1. Open the browser, open the menu and select Update Recovery.

    2. Click Check for update.

    3. Restart the browser to complete the update.
