【Vulnerability Alert】Trend Micro Apex Central Has 2 Critical Security Vulnerabilities

- Subject: 【Vulnerability Alert】Trend Micro Apex Central Has 2 Critical Security Vulnerabilities
- Content:
    - Forwarded from Taiwan Computer Network Emergency Response Team & Coordination Center TWCERTCC-200-202506-00000013
    - Trend Micro Apex Central is a centralized management platform by Trend Micro used to manage various Trend Micro security solutions, including gateways, mail servers, file servers, and enterprise desktops. A major security advisory was recently released to patch 2 vulnerabilities:
    - 【CVE-2025-49219, CVSS: 9.8】 Trend Micro Apex Central has an insecure deserialization operation that allows unauthenticated remote attackers to execute arbitrary code on affected Apex Central installations.
    - 【CVE-2025-49220, CVSS: 9.8】 Trend Micro Apex Central has an insecure deserialization operation that allows unauthenticated remote attackers to execute arbitrary code on affected Apex Central installations.
- Affected Platforms:
    - Apex Central 2019 (On-prem) and earlier versions
    - Apex Central as a Service SaaS
- Suggested Measures:
    - Please go to the official website for patching: https://success.trendmicro.com/en-US/solution/KA-0019926
