Vulnerability Alert Significant Security Vulnerability in Fortinet's FortiWeb (CVE-2025-25257)

- Subject: Vulnerability Alert Significant Security Vulnerability in Fortinet's FortiWeb (CVE-2025-25257)
- Content Description:
  - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center TWCERTCC-200-202507-00000005
  - Fortinet's FortiWeb is a web application firewall product that provides functions including anomaly detection, API protection, bot mitigation, and advanced threat analysis. Recently, Fortinet issued a significant security vulnerability announcement (CVE-2025-25257, CVSS: 9.6). This vulnerability may allow unauthenticated attackers to execute unauthorized SQL code or commands through specially crafted HTTP or HTTPS requests.
- Affected Platforms:
  - FortiWeb versions 7.0.0 to 7.0.10
  - FortiWeb versions 7.2.0 to 7.2.10
  - FortiWeb versions 7.4.0 to 7.4.7
  - FortiWeb versions 7.6.0 to 7.6.3
- Suggested Measures:
  - Please update to FortiWeb 7.0.11, FortiWeb 7.2.11, FortiWeb 7.4.8, FortiWeb 7.6.4
