¶Vulnerability Alert¶Weiqiao Information Developed Signature Service (BatchSignCS) has Arbitrary File Write vulnerability

- Subject: ¶Vulnerability Alert¶Weiqiao Information Developed Signature Service (BatchSignCS) has Arbitrary File Write vulnerability
- Content Description:
 - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center TWCERTCC-200-202507-00000008
 - ¶Weiqiao Information | Signature Service (BatchSignCS) - Arbitrary File Write through Path Traversal¶(CVE-2025-7619, CVSS: 8.8) Weiqiao Information's developed Signature Service (BatchSignCS) is a Windows background program. It has an Arbitrary File Write vulnerability. When the program is open, if a user browses a malicious website, a remote attacker can write arbitrary files to any path, and potentially exploit this vulnerability to execute arbitrary code.
- Affected Platforms:
 - Signature Service (BatchSignCS) version 3.138 (inclusive) and earlier
- Suggested Measures:
 - Update to version 3.145 (inclusive) and later
