[Vulnerability Alert] Significant Security Vulnerability in Cisco's Identity Service (CVE-2025-20337)

- Subject: [Vulnerability Alert] Significant Security Vulnerability in Cisco's Identity Service (CVE-2025-20337)
- Content:
 - Forwarded from Taiwan Computer Network Emergency Response Team/Coordination Center TWCERTCC-200-202507-00000012
 - Cisco Identity Services Engine (ISE) is an identity-based security management platform that collects information from networks and user devices, and enforces policies and makes regulatory decisions within the network infrastructure. Cisco has released a major security vulnerability advisory (CVE-2025-20337, CVSS: 10.0) and released updated versions. This vulnerability exists in specific APIs of Cisco ISE and Cisco ISE-PIC. Attackers can exploit this vulnerability without any valid credentials, allowing unauthenticated remote attackers to execute arbitrary code as root on the underlying operating system.
- Affected Platforms:
 - Cisco ISE and ISE-PIC versions 3.3, 3.4
- Recommended Action:
 - Apply patches according to the solutions released on the official website:
<https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-is-e-unauth-rce-ZAd2GnJ6>
