[Vulnerability Alert] Privilege Escalation Vulnerability Exists in the Connected Middleware Developed by Digital China

- Subject: [Vulnerability Alert] Privilege Escalation Vulnerability Exists in the Connected Middleware Developed by Digital China
- Content:
 - Forwarded from Taiwan Computer Network Emergency Response Team/Coordination Center TWCERTCC-200-202507-00000019
 - [Digital China | Connected Middleware - Privilege Escalation] (CVE-2025-7344, CVSS: 8.8)
A privilege escalation vulnerability exists in the connected middleware developed by Digital China. A remote attacker who has obtained general permissions can exploit specific APIs to gain administrator privileges.
- Affected Platforms:
 - Connected Middleware version 2.5.1 build 0161 (inclusive) and earlier
- Recommended Action:
 - Update to version 2.3.2 build 0115 (inclusive) or later and install patch KB202504001
