Vulnerability Alert SAP has issued a major security advisory for multiple products

- Subject: Vulnerability Alert SAP has issued a major security advisory for multiple products
- Details:
  - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center TWCERTCC-200-202508-00000009
  - CVE-2025-42957, CVSS: 9.9 This vulnerability exists in SAP S/4HANA and SAP SCM Characteristic Propagation, allowing an attacker with user privileges to exploit a vulnerability in an RFC-exposed function module to inject arbitrary ABAP code into the system, bypassing necessary authorization checks.
  - CVE-2025-42950, CVSS: 9.9 This vulnerability exists in SAP Landscape Transformation (SLT), allowing an attacker with user privileges to exploit a vulnerability in an RFC-exposed function module to inject arbitrary ABAP code into the system, bypassing necessary authorization checks.
  - CVE-2025-42951, CVSS: 8.8 An authorization vulnerability exists in SAP Business One (SLD), allowing an authenticated attacker to obtain administrator privileges for the database by calling the corresponding API.
- Affected Platforms:
  - SAP S/4HANA (Private Cloud or On-Premise) S4CORE versions 102, 103, 104, 105, 106, 107, 108
  - SAP Landscape Transformation (Analysis Platform) DMIS versions 2011_1_700, 2011_1_710, 2011_1_730, 2011_1_731, 2011_1_752, 2020
  - SAP Business One (SLD) B1_ON_HANA version 10.0, SAP-M-BO version 10.0
- Recommended Actions:
  - Patch according to the solution released on the official website: https://support.sap.com/en/my-support/knowledge-base/security-notes-news/august-2025.html
