[Vulnerability Alert] Security Flaw in Third-Party Tool Used by Openfind May Lead to XSS Attacks

Subject：[Vulnerability Alert] Security Flaw in Third-Party Tool Used by Openfind May Lead to XSS Attacks

Content：

- Forwarded from Taiwan Computer Emergency Response Team / Coordination Center (TWCERTCC-200-202508-00000018)
    - Recently, Openfind's Email Threat Lab discovered a security vulnerability in a third-party tool used in the MailGates / MailAudit systems during access log analysis. Attackers have successfully exploited this vulnerability through XSS (Cross-Site Scripting) attacks, which may result in user data leakage and unauthorized access to the file system.
    - Openfind has updated the affected third-party module versions and released a security patch. Users are advised to update as soon as possible.
- Affected Platforms:
  MailGates 5.0/6.0, MailAudit 5.0/6.0
- Recommended Actions:
    - For MailGates / MailAudit Standard Edition, please go to the [Online Update] page:
        - Version 6.0: Update patches sequentially to 6.1.9.050
        - Version 5.0: Update patches sequentially to 5.2.10.097
