[Vulnerability Alert] Commvault has a major security vulnerability (CVE-2025-57790)

- Subject: [Vulnerability Alert] Commvault has a major security vulnerability (CVE-2025-57790)
- Content:
  - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center TWCERTCC-200-202508-00000016
  - CommVault, a backup and data protection software vendor known for its enterprise-level integrated data management solutions, supports multi-platform and multi-environment backup and recovery, and provides efficient data protection technology and cloud integration capabilities. Recently, a major security vulnerability advisory (CVE-2025-57790, CVSS 3.x: 8.8) was released. This vulnerability allows a remote attacker to use path traversal to perform unauthorized file system access, which may lead to remote code execution.
- Affected Platforms:
  - Commvault versions 11.32.0 to 11.32.101, and Commvault versions 11.36.0 to 11.36.59.
- Recommended Measures:
  - Update to Commvault version 11.32.102 or later, or Commvault version 11.36.60 or later.
