[Vulnerability Alert] New Partner Technology　N-Reporter, N-Cloud, N-Probe - OS Command Injection

- Subject: [Vulnerability Alert] New Partner Technology　N-Reporter, N-Cloud, N-Probe - OS Command Injection

- Content:
    - Forwarded from Taiwan Computer Network Emergency Response Team/Coordination Center TWCERTCC-200-202509-00000012
    - [New Partner Technology　N-Reporter, N-Cloud, N-Probe - OS Command Injection] (CVE-2025-10589, CVSS: 8.8) The N-Reporter, N-Cloud, and N-Probe products developed by New Partner Technology have an OS Command Injection vulnerability. An authenticated remote attacker can inject arbitrary operating system commands and execute them on the server.
- Affected Platforms:
    - Affected Products: N-Reporter, N-Cloud, N-Probe
    - Affected Firmware Versions: 6.x series versions prior to 6.1.187(20250730-1734) (exclusive), 7.x series versions prior to 7.0.009(20250805-1505) (exclusive)
    - Affected Kernel Versions: Versions prior to 20250811094737 (exclusive)
- Recommended Action:
    - Firmware Update:
    - 6.x versions should be updated to 6.1.187(20250730-1734) (inclusive) and later versions
    - 7.x versions should be updated to 7.0.009(20250805-1505) (inclusive) and later versions
    - Kernel Update:
    - Please update to version 20250811094737 (inclusive) and later versions
    - Firmware and Kernel must be updated simultaneously to ensure the patch is effective.
