[Vulnerability Alert] Fortinet FortiWeb has a Critical Security Vulnerability (CVE-2025-64446)

- Subject: [Vulnerability Alert] Fortinet FortiWeb has a Critical Security Vulnerability (CVE-2025-64446)
- Content:
 - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center Security Alert TWCERTCC-200-202511-00000013
 - Fortinet FortiWeb is a Web Application Firewall product that offers features including anomaly detection, API protection, bot mitigation, and advanced threat analysis.
 - Recently, Fortinet released a critical security vulnerability advisory (CVE-2025-64446, CVSS: 9.8). The vulnerability is a relative path traversal vulnerability that may allow an unauthenticated attacker to execute administrative commands on the system through specially crafted HTTP or HTTPS requests.
 - Note: Fortinet has observed attacks exploiting this vulnerability. It is recommended to immediately implement temporary mitigation measures to prevent potential attacks targeting this vulnerability.
- Affected Platforms:
 - FortiWeb versions 7.0.0 through 7.0.11
 - FortiWeb versions 7.2.0 through 7.2.11
 - FortiWeb versions 7.4.0 through 7.4.9
 - FortiWeb versions 7.6.0 through 7.6.4
 - FortiWeb versions 8.0.0 through 8.0.1
- Recommended Measures:
 - Please update to the following versions: FortiWeb version 7.0.12, FortiWeb version 7.2.12, FortiWeb version 7.4.10, FortiWeb version 7.6.5, or FortiWeb version 8.0.2.
