# **[VULNERABILITY ALERT] Ivanti's EPM Has 2 Critical Security Vulnerabilities (CVE-2025-10573) (CVE-2025-13659)**

- Subject: [VULNERABILITY ALERT] Ivanti's EPM Has 2 Critical Security Vulnerabilities (CVE-2025-10573) (CVE-2025-13659)
- Content Description:
  - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center TWCERTCC-200-202512-00000004
  - Ivanti's Endpoint Manager (EPM) is a system specialized for device management, providing management and protection for Windows, macOS, and Linux devices.
  - [CVE-2025-10573, CVSS: 9.6] This is a Stored Cross-Site Scripting (XSS) vulnerability, allowing a remote unauthenticated attacker to execute arbitrary JavaScript code in an administrator session.
  - [CVE-2025-13659, CVSS: 8.8] This is an Arbitrary File Write vulnerability, due to improper control over dynamically managed code resources, allowing a remote unauthenticated attacker to write arbitrary files on the server, which may lead to Remote Code Execution.
- Affected Platforms:
  - EPM versions up to and including 2024 SU4
- Recommended Actions:
  - Please update to the following version: EPM 2024 SU4 SR1 version

---

Computer and Communication Center  
Network Systems Division, Respectfully
