[VULNERABILITY ALERT] Zimbra's Zimbra Collaboration Suite Contains a Critical Security Vulnerability (CVE-2025-68645)

- Subject: [VULNERABILITY ALERT] Zimbra's Zimbra Collaboration Suite Contains a Critical Security Vulnerability (CVE-2025-68645)

- Content Description:
  - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center Security Alert TWCERTCC-200-202512-00000014
  - A critical Local File Inclusion (LFI) vulnerability exists in the Webmail Classic UI of the email server system Zimbra Collaboration Suite, assigned vulnerability number CVE-2025-68645 (CVSS: 8.8).
  - This vulnerability stems from improper handling of user-provided request parameters by the RestFilter Servlet. A remote unauthenticated attacker can make requests to the /h/rest endpoint, thereby influencing internal request distribution and including arbitrary files within the WebRoot directory.
- Affected Platforms:
  - Zimbra Collaboration Suite version 10.0
  - Zimbra Collaboration Suite version 10.1
- Recommended Actions:
  - Apply patches according to the solutions released on the official website.
