[VULNERABILITY ALERT] Fortinet FortiFone Web Portal Contains a Critical Security Vulnerability (CVE-2025-47855)

- Subject: [VULNERABILITY ALERT] Fortinet FortiFone Web Portal Contains a Critical Security Vulnerability (CVE-2025-47855)

- Content Description:
    - Forwarded from Taiwan Computer Emergency Response Team/Coordination Center Security Alert TWCERTCC-200-202601-00000009
    - FortiFone Web Portal is the centralized management interface for Fortinet's FortiVoice systems, used for remote configuration of telephone extensions and monitoring of call logs and system performance.
    - Recently, Fortinet released a critical security vulnerability announcement. This vulnerability (CVE-2025-47855, CVSS: 9.8) may allow an unauthenticated attacker to obtain device configurations through specially crafted HTTP or HTTPS requests, thereby accessing sensitive data.
- Affected Platforms:
    - FortiFone versions 3.0.13 to 3.0.23
    - FortiFone versions 7.0.0 to 7.0.1
- Recommended Actions:
    - Please update to the following versions: FortiFone version 3.0.24 (inclusive) or later; FortiFone version 7.0.2 (inclusive) or later.
