[Vulnerability Alert] Critical Security Vulnerability Found in Cisco Meeting Management (CVE-2026-20098)

- Subject Explanation: [Vulnerability Alert] Critical Security Vulnerability Found in Cisco Meeting Management (CVE-2026-20098)
- Content Description:
 - Forwarding Taiwan Computer Emergency Response Team / Coordination Center (TWCERT/CC) Security Alert TWCERTCC-200-202602-00000003
 - Cisco Meeting Management provides an administrator web interface for monitoring and managing video conferences, including functions such as adding/removing participants, muting, changing screen layouts, and starting recordings.
 - Cisco recently released a critical security advisory (CVE-2026-20098, CVSS: 8.8). This is an arbitrary file upload vulnerability that may allow an authenticated remote attacker to upload arbitrary files, execute arbitrary commands, and elevate privileges on the affected system to root.
 - Note: To exploit this vulnerability, the attacker must possess at least valid user credentials for a Video Operator.
- Impacted Platforms:
 - Cisco Meeting Management 3.12 and earlier versions
- Suggested Measures:
 - Please update to the following versions:
 - Cisco Meeting Management 3.12.1 MR and later versions
