Vulnerability Alert Two Critical Security Vulnerabilities in Ivanti Endpoint Manager Mobile (EPMM)

- Subject: Vulnerability Alert Two Critical Security Vulnerabilities in Ivanti Endpoint Manager Mobile (EPMM)

- Description:
  - Forwarded from Taiwan Computer Emergency Response Team / Coordination Center (TWCERT/CC) Security Alert: TWCERTCC-200-202605-00000004
  - Ivanti Endpoint Manager Mobile (EPMM) is a mobile device management solution that centrally manages iOS, Android, macOS, and Windows devices. Recently, Ivanti released an announcement regarding critical security vulnerabilities.
  - CVE-2026-5786, CVSS: 8.8 This is an improper access control vulnerability that allows an authenticated remote attacker to obtain administrative access privileges.
  - CVE-2026-5787, CVSS: 8.9 This is an improper certificate validation vulnerability that allows an unauthenticated remote attacker to impersonate a registered Sentry host and obtain a valid CA-signed client certificate.
- Affected Platforms:
  - Ivanti Endpoint Manager Mobile versions 12.8.0.0 (inclusive) and earlier
- Recommended Actions:
  - Apply patches according to the solutions released on the official website: https://hub.ivanti.com/s/article/May-2026-Security-Advisory-Ivanti-Endpoint-Manager-Mobile-EPMM-Multiple-CVEs?language=en_US
