□Vulnerability Alert□High-Risk Security Vulnerability in Ivanti Xtraction (CVE-2026-8043)

- Subject: □Vulnerability Alert□High-Risk Security Vulnerability in Ivanti Xtraction (CVE-2026-8043)
- Description:
 - Forwarded from Taiwan Computer Emergency Response Team / Coordination Center Security Advisory TWCERTCC-200-202605-00000007
 - Ivanti Xtraction is an IT reporting and data visualization platform that integrates data from different IT systems into a single dashboard for real-time viewing and analysis. Ivanti recently released a critical security vulnerability advisory (CVE-2026-8043, CVSS: 9.6). This vulnerability allows an authenticated attacker to read sensitive files and write arbitrary HTML files into the website directory.
- Affected Platforms:
 - Ivanti Xtraction versions 2026.1 (inclusive) and earlier
- Recommended Actions:
 - Please update to Ivanti Xtraction version 2026.2 (inclusive) or later
