- [Apply for a Campus Wireless LAN Account](#)
- [Campus Wireless LAN Account Status Enquiry](#)

Pulse Secure 9.1 Manually Download & Setup(2019/08/02)

Download Pulse Secure 9.1

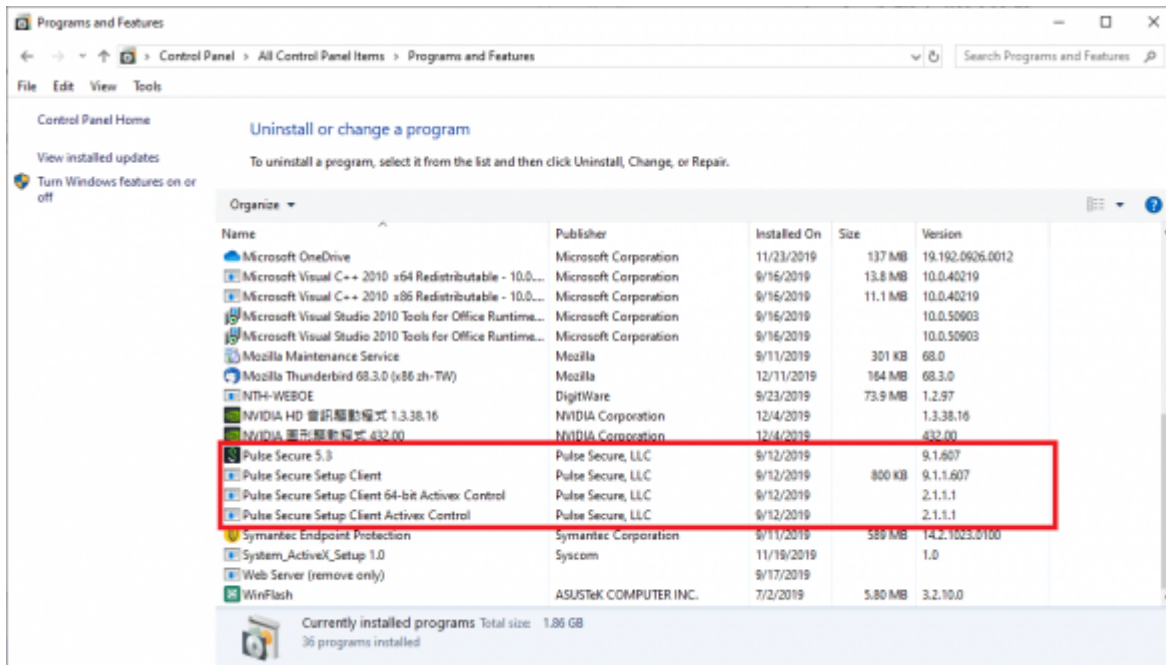

- Please download the [Pulse Secure 9.1 setup file for each platform](#), and install it manually.

Setup Pulse Secure 9.1

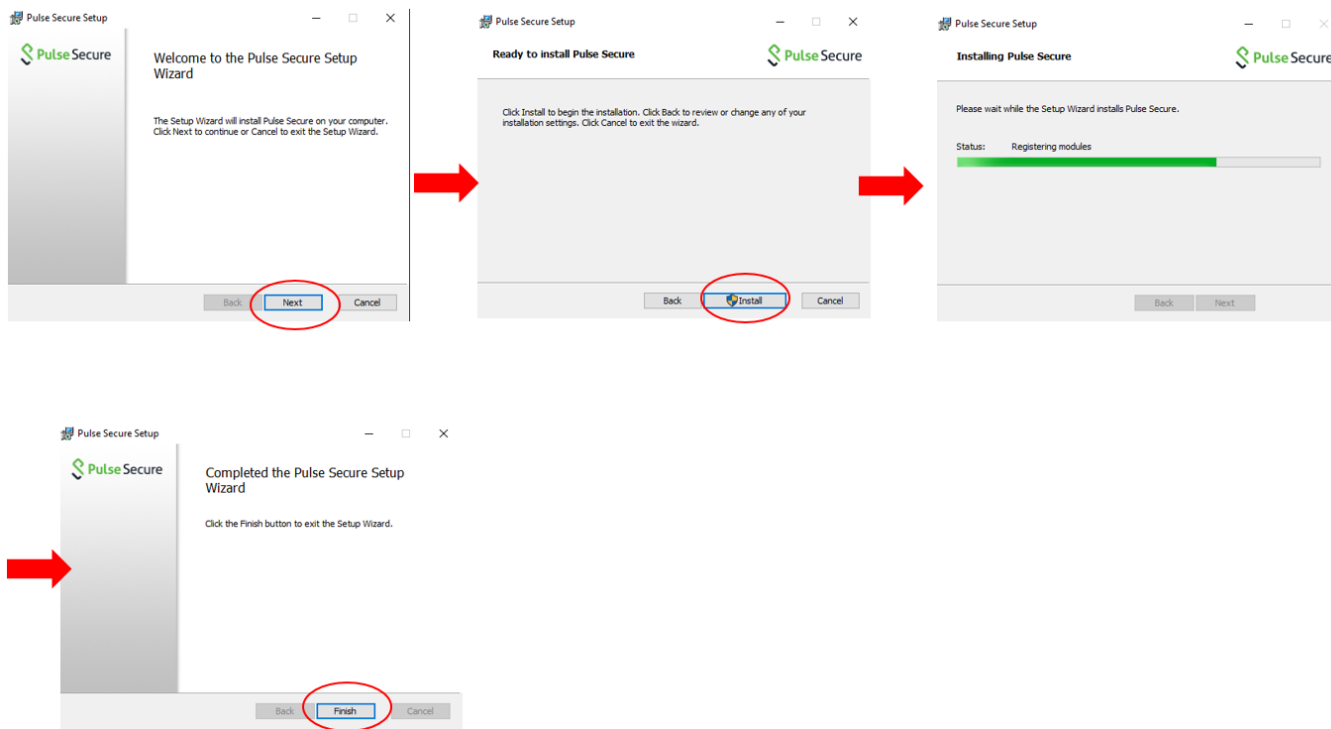

- Step1: Check installation version
 1. If Pulse Secure has not yet installed on your computer, please jump to Step3.
 2. Otherwise, run the Pulse Secure and click `Help`→`About` to view the version. If the version is older than '9.1.1', continue to Step2.

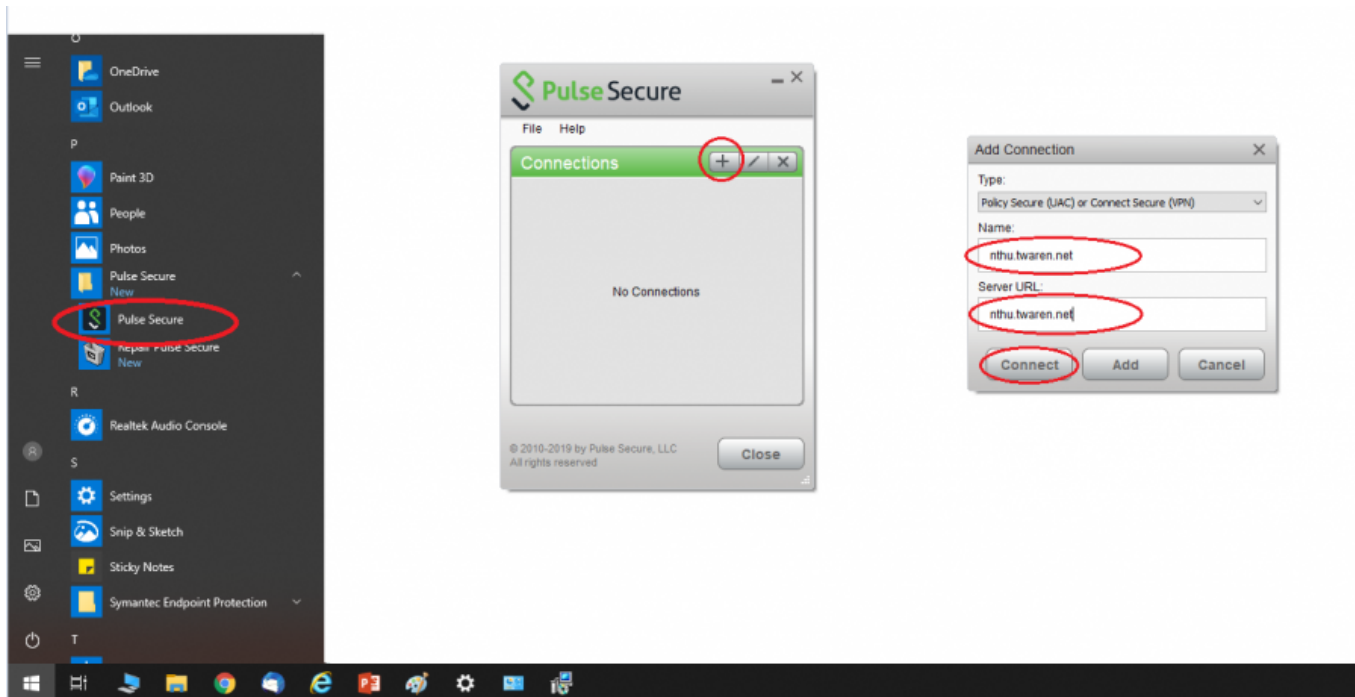

- Step2: Uninstall the previous installed Pulse Secure version and its related program. Take Windows for example:
 1. Open [Control Panel]→[Programs and Features]
 2. Select Pulse Secure related software.
 3. Click [Uninstall].

- Step3: Open the downloaded Pulse Secure 9.1 setup file and install it by the following steps.

- Step4: Run the Pulse Secure and click [Help]→[About]to confirm that the version is '9.1'. (Same steps shown in Step1(2))
- Step5: Before connecting SSL VPN, the following configurations might be requested.
 1. Click [+] button, enter “nthu.twaren.net” in the fields of [Name] and [Server URL].
 2. Click [connect].

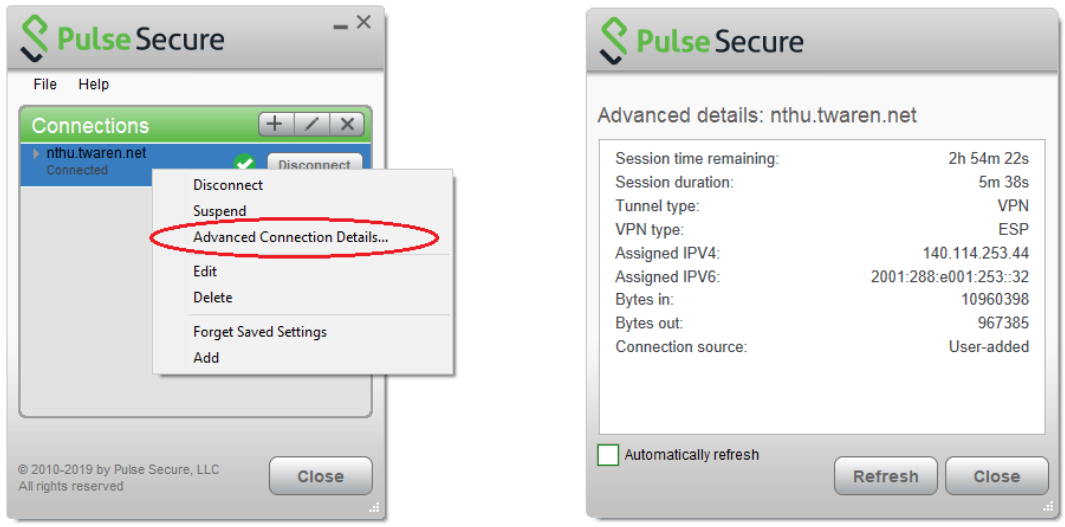

- Step6: For authentication, enter campus wireless LAN account and password.

- Step7: Verify the Pulse Secure is running successfully by checking the status of Pulse Secure process in the right bottom of the screen.

- Step8: View the connection information of SSL VPN.

- Step9: To run Pulse Secure again, follow the authentication steps shown in Step5 ~ Step6
