[Vulnerability Alert]Critical Security Vulnerability Found in Microsoft SharePoint Server (CVE-2026-45659)

- Subject: [Vulnerability Alert]Critical Security Vulnerability Found in Microsoft SharePoint Server (CVE-2026-45659)
- Description:
 - Forwarded from Taiwan Computer Emergency Response Team / Coordination Center Security Alert TWCERTCC-200-202605-00000015
 - Microsoft SharePoint Server is an enterprise-grade collaboration platform that provides document management and team collaboration features, serving as the core platform for enterprise information integration. Recently, Microsoft released a critical security advisory (CVE-2026-45659, CVSS: 8.8). This vulnerability is an untrusted data deserialization vulnerability, which allows an authenticated attacker to execute code remotely via the network.
- Affected Platforms:
 - Microsoft SharePoint Enterprise Server 2016 versions prior to 16.0.5552.1002, Microsoft SharePoint Server 2019 versions prior to 16.0.10417.20128, Microsoft SharePoint Server Subscription Edition versions prior to 16.0.19725.20280
- Recommended Actions:
 - Apply patches according to the solutions released on the official website: <https://msrc.microsoft.com/update-guide/vulnerability/CVE-2026-45659>
